

WATER UTILITY INFRASTRUCTURE SOLUTIONS:

Comprehensive, Reliable, Accurate

Choose Tribus Services, a Corix Company for project planning and implementation that satisfies customers and meets project goals. Founded as FieldTech in 1995, and known as part of the Corix Group of Companies since 2006, we're bringing next-generation solutions to customers worldwide.

We serve urban and rural municipalities, cooperatives and investor-owned utilities.

We offer consulting services, single project components, or partnership from creation through deployment.

Safety Focus

Tribus Services is vigilant and dedicated to ingraining safety in all we do. We adhere to federal and state provincial regulations and meet industry best practices. We train our people and maintain equipment—and we don't cut corners.

Water Meter Installations

Tribus Services installs water meters sized from 5/8 inch to 12 inches. Project sizes have ranged from just 2,500 meters to nearly 200,000 meters. Our services include water meter right-sizing, plumbing modifications, and complete cut-ins, installing water meters where none existed.

Smart Metering Deployment

Create and carry out Smart Meter/Advanced Meter Infrastructure (AMI) projects with confidence. Services include:

- Project management and consulting
- Smart meter installations, exchanges and retrofits
- Smart meter supply and inventory management
- The latest technology & tools

Water Meter Testing

Water providers including utilities, municipalities, private water companies, communities, universities and hospitals partner with

Tribus Services for accurate testing of large and small meters. We ensure proper function, assess water "lost" due to poor calibration, and help set replacement timing. Services include:

- Water meter bench testing
- Large water meter testing, onsite and offsite
- Repair services
- Annual large water meter testing for municipalities and private water companies
- Ensuring compliance with American Water Works Association (AWWA) Standards

Our Gloucester City, New Jersey regional facility uses a state-of-the-art Mars Series 2400 water meter test bench, certified annually by the New Jersey Department of Weights and Measures, to assure 100 percent accuracy on all water meters tested. Tribus Services water meter testing technicians are highly trained to follow stringent AWWA standards.

Meter Reading

With more than 400 million electric, gas and water meter reads provided, Tribus Services is ready to help you. Services include:

- Disconnects/re-connects
- Meter maintenance
- Customer notification
- Meter changes
- Pay-per-read solutions

Quality and Value

Trust Tribus Services to help you find the right technology and approach, set a fair price and schedule, deliver on time and keep the project within scope. Well-trained employees are the face of your company at each customer's home. Performance monitoring and audits ensure quality meets our strict standards.

You get high-quality solutions that comply with regulations and yield the greatest value. Call Tribus Services today to tell us about your project: 877-678-3842.
